STQC - Certified Internal Information Security Auditor (STQC – CIISA) Course - *(offered On-line through VC)*

Course description

The success of any business and effectiveness of business decisions depends largely on the availability and integrity of business information and the extent to which the information can be relied upon.

The information, therefore, is an asset of value to the organization needing adequate protection against unauthorized access, modification and removal. With advancement of information technology, the traditional methods of information management have been replaced with information management through IT Enabled mechanisms such as maintenance in electronic files, databases, fast and easy access through computers, even from remote locations.

This has necessitated the need for advanced method for Information System Management System. ISO/IEC 27002 stipulates good practices for ISMS while ISO/IEC 27001 stipulates requirements for ISMS to be established in an organization.

One of the means of determining effectiveness of ISMS in an organization is to carryout internal audits of ISMS of the organization. This three days training program aims in teaching ISMS Internal Audit techniques.
